

Jonas Makeke

Junior Web2 & Web3 Developer | Blockchain Enthusiast | Content Creator

He/Salut

I am a Web2 and Junior Web3 Developer passionate about blockchain and decentralized technologies. I specialize in transforming complex Web3 concepts into practical, scalable, and accessible solutions.

With experience in front-end development and ongoing training in Haskell and Plutus, I build bridges between traditional web applications and modern blockchain systems. My goal is to contribute to secure, community-driven decentralized tools, particularly within the Cardano ecosystem.

Education & Experience

2022

Web3 Content Creator

Online | **2022** – Present

- Create educational content about Web3, blockchain and cryptocurrencies
- Simplify technical concepts for community adoption
- Share insights about Cardano, Polkadot and decentralized technologies

2021

Community Contributor – Cardano Ecosystem

Goma | Since **2021**

- Active participation in Project Catalyst
- Organized blockchain awareness sessions for students
- Helped introduce decentralized governance and smart contracts

2025

ETHNile Hackathon Participant

Uganda | **2025**

- Participated in Web3 hackathon focused on decentralized solutions
- Built a decentralized application integrated with smart contracts
- Worked in a collaborative blockchain development team

2026

Cardano Africa Tech Summit Hackathon

Goma Hub | **2026**
Worked with developers to explore decentralized solutions within the Cardano ecosystem.

THREE WORDS TO DESCRIBE MYSELF:

- Curious
- Innovative
- Determined

Skills & Proficiencies

- **Web Development:** HTML, CSS, JavaScript
- **Blockchain Development:** Haskell, Plutus, basic Solidity
- **Web3:** dApp development, smart contract interaction
- **Tools:** Git, GitHub, VS Code etc.
- **Content & Community:** Blockchain education and Web3 content creation

Ecosystems:

- Cardano
- Ethereum
- Polkadot

Education:

Coxygen University

- Blockchain Development (Haskell & Plutus)

Self-Taught Developer Learning:

- JavaScript
- Web development
- Blockchain technologies

Interests

- Blockchain innovation
- Decentralized governance
- Open-source development
- Web3 education
- Community building
